

JULIETTE ROBLES

BIO

Juliette Robles walks toward her roots and the healing of pains that imply an imposed disconnect. The path drawn by this artist of Andean descent, born in Barcelona, is comprised of songs with South American rhythms, jazz harmony, and her own style.

In her journey of self-discovery, she takes off her blindfold to explore an inner world filled with emotions she had not given room to, leading to her first EP in 2019, titled 'Inmersión,' which means immersion.

In 2021, Juliette embarks on a physical journey to reconnect with her origins and execute her project in Peru, Argentina, and Chile. This journey made her first album possible, titled 'El Gran Rio' or 'Big River,' which will be released in 2024.

Her style is imbued with her constant discovery of identity, influenced by her journeys and her studies in music and mythology.
